Project Title	Script-Controlled ACL – Restrict Record Access Based on Field Value
Team ID	SWTID-2026-1695
Project Name	Skill Wallet

Customer Problem Statement

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a ServiceNow System Administrator managing the Skill Wallet application	restrict who can View, Create, Update, and Delete Skill Wallet records	the existing role-based ACL only checks the user's assigned role	it does not evaluate the actual field value (e.g., Department) stored on the record itself	concerned about cross-department data exposure and audit/compliance risk
